

Task 1 Report

Employee Management System Dashboard

Frontend Internship – Synexus Software Technologies

Submitted By

Khadija Ayub

Task: Week 1 – Dashboard UI & Routing Setup

Submission Date: 8 July 2026

1. Objective

The objective of this task was to develop the initial user interface of an Employee Management System using React. The focus was on creating a responsive administrative dashboard with reusable components, routing, and a clean, modern layout that serves as the foundation for future development.

2. Features Implemented

- Responsive dashboard layout
- Persistent collapsible sidebar
- Top navigation header
- React Router configuration
- Dashboard overview page
- Employee statistics cards
- Employee table with sample data
- Responsive design for desktop, tablet, and mobile devices
- Reusable React components
- Clean and maintainable CSS styling

3. Technologies Used

- React
- Vite
- JavaScript (ES6)
- React Router DOM
- React Icons
- CSS3
- Git & GitHub

4. Components Developed

DashboardLayout, Sidebar, Header, StatCard, and EmployeeTable. Detailed descriptions are provided in the COMPONENTS.md file.

5. Responsive Design

The application adapts to desktop, tablet, and mobile screens through media queries, a collapsible sidebar, responsive cards, and a horizontally scrollable employee table on smaller devices.

6. Deliverables

The GitHub repository, README documentation, component notes, screenshots, and a demo walkthrough video have been completed. The demo video link has been shared via WhatsApp as instructed.

7. Learning Outcomes

- React functional components
- Component reusability
- Props
- useState
- React Router
- Conditional rendering
- Dynamic rendering using map()
- CSS Flexbox
- Responsive Web Design
- Git & GitHub workflow

8. Future Enhancements

Future tasks will extend this project by implementing employee CRUD operations, department and attendance management, authentication, backend API integration, and database connectivity.

9. Conclusion

Task 1 has been successfully completed. The project provides a responsive and reusable dashboard interface that establishes a solid foundation for upcoming internship tasks while following clean coding practices and component-based architecture.
